

LADDOMAT® 11-30 "Duo"

Thermal quick charging unit —
For quicker charging of the accumulator tank

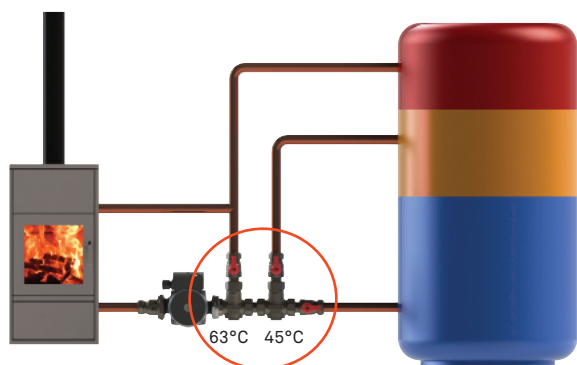

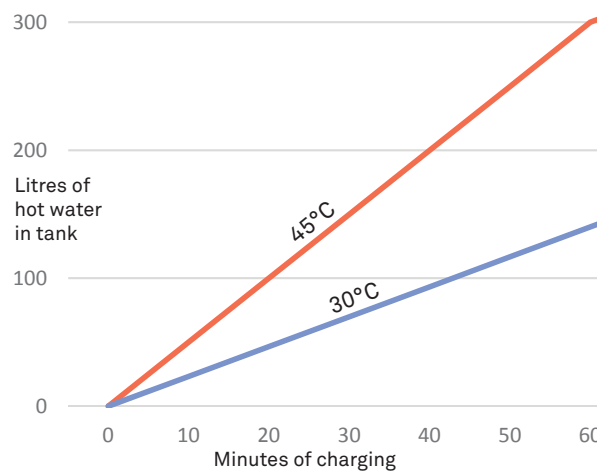

Laddomat 11-30 "Duo" increases the flow of hot water from the boiler to the accumulator tank.

- Laddomat 11-30 "Duo" consists of 2 pcs Laddomat 11-30 valves and makes it possible to speed up the charging during start-up by using the warmer water from the upper part of the tank as cooling.
- The "Duo"-connection is specially suitable for smaller installations where you want to get a larger volume of hot water in the top of the tank quicker after firing begins.

Technical data

Thermostat cartridge:	63°+45°C
Pump:	6 m
Connection:	Cu22
	R25
Max boiler output:	40 kW

Example showing charging cycle with
Laddomat 11-30 "Duo" vs. Laddomat 11-30.
Boiler output 10 kW, 20°C ΔT
